Disclaimer

This companion guide for the ANSI ASC X12N 837 transaction has been created for use in conjunction with the standard Implementation Guide. It should not be considered a replacement for the Implementation Guide, but rather used as an additional source of information. The companion guide contains data clarifications derived from specific business rules that apply exclusively to Medicaid processing for Washington State DSHS. The guide also includes useful information about sending and receiving data to and from the ProviderOne system.

1 Introduction

The Administrative Simplification provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, Title II) includes requirements that national standards be established for electronic health care transactions, and national identifiers for providers, health plans, and employers. This requires Washington State Department of Social and Health Services (DSHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions between covered entities (health care providers, health plans, and healthcare clearinghouses).

The intent of these standards is to improve the efficiency and effectiveness of the nation's health care system by encouraging widespread use of electronic data interchange standards in health care. The intent of the law is that all electronic transactions for which standards are specified must be conducted according to the standards. These standards were not imposed arbitrarily but were developed by processes that included significant public and private sector input.

1.1 Document Purpose

Companion Guides are used to clarify the exchange of information on HIPAA transactions between the DSHS ProviderOne system and its trading partners. DSHS defines trading partners as covered entities that either submit or retrieve HIPAA batch transactions to and from ProviderOne.

This Companion Guide provides information related to electronic submission of 837 Claims Transactions to DSHS by approved trading partners. The three distinct claim transaction formats documented are:

- 837 Professional (Claims and Encounters)
- 837 Institutional (Claims and Encounters)
- 837 Dental

This Companion Guide is intended for trading partner use in conjunction with the ANSI ASC X12N National Implementation Guides listed below. The ANSI ASC X12N Implementation Guides can be accessed at <http://www.wpc-edi.com>.

The Standard Implementation Guides for Claim Transactions are:

- 837 Healthcare Claim: Professional (004010X098)
- 837 Healthcare Claim: Institutional (004010X096)
- 837 Healthcare Claim: Dental (004010X097)

DSHS has also incorporated all of the approved 837 Addenda listed below.

- ASC X12N 837 Professional (004010X098A1)
- ASC X12N 837 Institutional (004010X096A1)
- ASC X12N 837 Dental (004010X097A1)

1.1.1 Intended Users

Companion Guides are intended to be used by members/technical staff of trading partners who are responsible for electronic transaction/file exchanges.

1.1.2 Relationship to HIPAA Implementation Guides

Companion Guides are intended to supplement the HIPAA Implementation Guides for each of the HIPAA transactions. Rules for format, content, and field values can be found in the Implementation Guides. This Companion Guide describes the technical interface environment with DSHS, including connectivity requirements and protocols, and electronic interchange procedures. This guide also provides specific information on data elements and the values required for transactions sent to or received from DSHS.

Companion Guides are intended to supplement rather than replace the standard Implementation Guide for each transaction set. The information in these documents is not intended to:

- Modify the definition, data condition, or use of any data element or segment in the standard Implementation Guides.
- Add any additional data elements or segments to the defined data set.
- Utilize any code or data values that are not valid in the standard Implementation Guides.
- Change the meaning or intent of any implementation specifications in the standard Implementation Guides.

2 Technical Infrastructure and Procedures

2.1 Technical Environment

2.1.1 Communication Requirements

This section will describe how trading partners can send 837 Transactions to DSHS using 2 methods:

- Secure File Transfer Protocol (SFTP)
- ProviderOne Web Portal

2.1.2 Testing Process

Completion of the testing process must occur prior to submitting electronic transactions in production to ProviderOne. Testing is conducted to ensure the following levels of HIPAA compliance:

1. Level 1 – Syntactical integrity: Testing of the EDI file for valid segments, segment order, element attributes, testing for numeric values in numeric data elements, validation of X12 or NCPDP syntax, and compliance with X12 and NCPDP rules.
2. Level 2 – Syntactical requirements: Testing for HIPAA Implementation Guide-specific syntax requirements, such as limits on repeat counts, used and not used qualifiers, codes, elements and segments. It will also include testing for HIPAA required or intra-segment situational data elements, testing for non-medical code sets as laid out in the Implementation Guide, and values and codes noted in the Implementation Guide via an X12 code list or table.
3. Level 7 – DSHS defined custom rules. All transactions will be validated against DSHS defined custom rules as specified in the Transaction Specification section.

Additional testing may be required in the future to verify any changes made to the ProviderOne system. Changes to the ANSI formats may also require additional testing. Assistance is available throughout the testing process.

Trading Partner Testing Procedures

1. ProviderOne companion guides and trading partner enrollment package are available for download via the web at <http://maa.dshs.wa.gov/dshshipaa>
2. The Trading Partner completes the Trading Partner Agreement and submits the signed agreement to DSHS.

Submit to: Provider Enrollment

PO Box 45562
Olympia, WA 98504-5562

For Questions call 1-800-562-3022 option 2, then option 5

3. The trading partner is assigned a Submitter ID, Domain, Logon User ID and password.
4. The trading partner submits all HIPAA test files through the ProviderOne web portal or Secure File Transfer Protocol (SFTP).
 - Web Portal URL: <https://www.waproviderone.org/edi>
 - SFTP URL: <sftp://ftp.waproviderone.org/>
5. The trading partner downloads acknowledgements for the test file from the ProviderOne web portal or SFTP.
6. If ProviderOne system generates a positive TA1 and positive 997 acknowledgement, the file is successfully accepted. The trading partner is then approved to send 837 HIPAA files in production.
7. If the test file generates a negative TA1 or negative 997 acknowledgement, then the submission is unsuccessful and the file is rejected. The trading partner needs to resolve all the errors that are reported on the negative TA1 or negative 997 and resubmit the file for test. Trading partners will continue to test in the testing environment until they receive a positive TA1 and positive 997.

2.1.3 Who to contact for assistance

- Telephone Number: 1-800-562-3022
 - Select option 2
 - Select option 4
 - All calls result in the assignment of a Ticket Number for problem tracking
- Hours: 8:00 AM – 5:00 PM Pacific Standard Time, Monday through Friday
- Information required for initial call:
 - Topic of Call (setup, procedures, etc.)
 - Name of caller
 - Submitter ID Number
 - Organization of caller
 - Telephone number of caller
 - Nature of problem (connection, receipt status, etc.)
- Information required for follow up call(s):
 - Assigned Ticket Number

2.2 Upload batches via Web Interface

Once logged into the ProviderOne Portal, select the Admin Tab and the following options will be presented to the user:

Screenshot of the ProviderOne Admin interface showing the 'Domain Maintenance' option selected.

The screenshot shows a web-based administrative interface for the ProviderOne system. At the top, there is a navigation bar with tabs: My Inbox, Admin, Provider, Claims, Reference, Client, TPL, Drug Rebate, Rate Setting, PA, Managed Care, Cash Receipt, and Payroll. The 'Admin' tab is currently selected. Below the navigation bar, a welcome message reads: "Welcome Administrator, Super . You have logged-in with Super Administrator profile." A dropdown menu labeled "Links: --Select--" is also present. The main content area is titled "Choose an Option." and contains a table listing various administrative tasks:

Domain Maintenance	Option to Maintain the Domain
User Maintenance	Option to Maintain the Users in the System
OrgUnit Maintenance	Option to Maintain Organization Units
AuditTrail Maintenance	Option to Maintain Audit Trail
Policy Impact	Impact of Role/Profile on various entities.
Data Dictionary Online	Option to view Data Dictionary Information
Broadcast Message	Create Broadcast Message
Alert Library Maintenance	Alert Library Maintenance
HIPAA	To Manage HIPAA transactions

At the bottom of the page, there is footer information: "Page ID: pgSubMenu(Menu)", "Environment: SysTst", "Server Time: 12/14/2007 11:27:55 EST", and a status bar showing "Done" and "Local intranet" with a zoom level of "100%".

Click on the HIPAA option to manage the HIPAA transactions.

In the HIPAA Transaction Management screen, the user can Upload file and Retrieve Acknowledgement/Response as shown below:

Screenshot of the ProviderOne Project Main Event Companion Guide interface, specifically the HIPAA Transaction Management screen.

The top navigation bar includes links for My Inbox, Admin, Provider, Claims, Reference, Client, TPL, Drug Rebate, Rate Setting, PA, Managed Care, Cash Receipt, and Payroll. A welcome message for the Administrator is displayed: "Welcome Administrator, Super. You have logged-in with Super Administrator profile." A dropdown menu labeled "Links: -Select--" is also present.

The main content area shows a sub-menu titled "Choose an Option." with three items:

- Upload File**: To Upload a file into the System
- Maintain Trading Partner**: To maintain Trading Partner profiles
- Retrieve Acknowledgement/Response**: To retrieve Acknowledgement and Responses

At the bottom of the page, status information is provided: "Page ID: pgSubMenu(Menu)", "Environment: SysTst", "Server Time: 12/14/2007 11:28:35 EST", and a browser status bar showing "Local intranet" and "100%".

In order to upload a file, the following steps are followed:

Click on the Upload button to upload a HIPAA file

The screenshot shows the ProviderOne software interface. At the top, there is a navigation bar with tabs: My Inbox, Admin, Provider, Claims, Reference, Client, TPL, Drug Rebate, Rate Setting, PA, Managed Care, Cash Receipt, and Payroll. The 'My Inbox' tab is selected. Below the navigation bar, a message says 'Welcome Administrator, Super . You have logged-in with Super Administrator profile.' A dropdown menu labeled 'Links: -Select-' is open. The main content area has a title 'Path: MyInbox/Batch Attachment Response'. It contains a message 'Please click on the Upload button to upload your file.' with two buttons: 'Close' and 'Upload'. At the bottom of the window, it says 'Page ID: pgBatchAttachmentResponse(Admin)', 'Environment: SysTst', and 'Server Time: 12/14/2007 11:29:06 EST'. The status bar at the bottom right shows 'Local intranet' and '100%'. There is also a toolbar with icons for back, forward, search, and other functions.

On file upload page click on the Browse button to attach HIPAA file from local file system. After selecting the file from the local file system, press OK to start the upload.

The screenshot shows a file upload dialog box. It has a header 'Attachment :'. Below it, a message says 'Please select the file to be uploaded:'. There is a text input field labeled 'Filename:' with a 'Browse...' button next to it. At the bottom right of the dialog box are 'OK' and 'Cancel' buttons. The status bar at the bottom right shows 'Local intranet' and '100%'. The URL 'Page ID: digFileAttachment(Common)' is visible at the bottom of the dialog.

Once the file is uploaded to the ProviderOne system success/failure message is displayed on the screen along with transmission details.

Screenshot of the ProviderOne system interface showing a successful file upload response.

The interface includes a top navigation bar with links: My Inbox, Admin, Provider, Claims, Reference, Client, TPL, Drug Rebate, Rate Setting, PA, Managed Care, Cash Receipt, and Payroll. A sub-navigation bar below shows "Welcome Administrator, Super" and "Path: MyInbox/ Batch Attachment Response".

Buttons on the left include "Menu", "Close", and "Upload". A message box prompts: "Please click on the Upload button to upload your file." Below this is a section titled "Upload File Response" with the heading "Thank You".

The main content area displays the following message:

The following File has been successfully uploaded:

2.3 Set-up, Directory, and File Naming Convention

2.3.1 SFTP Set-up

Trading partners can contact 1-800-562-3022 for information on establishing connections through the FTP server. Upon completion of set-up, they will receive additional instructions on FTP usage.

2.3.2 SFTP Directory Naming Convention

There would be two categories of folders under Trading Partner's SFTP folders:

1. TEST – Trading Partners should submit and receive their test files under this root folder
2. PROD – Trading Partners should submit and receive their production files under this root folder

Following folder will be available under TEST/PROD folder within SFTP root of the Trading Partner:

'HIPAA Inbound' - This folder should be used to drop the Inbound files that needs to be submitted to DSHS

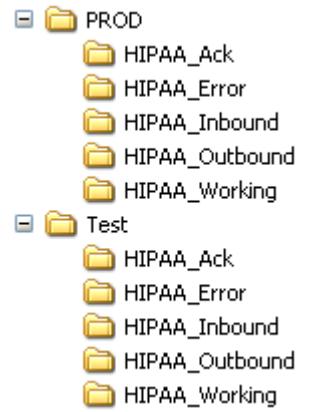

'HIPAA Ack' - Trading partner should look for acknowledgements to the files submitted in this folder. TA1, 997 and custom error report will be available for all the files submitted by the Trading Partner

'HIPAA Outbound' – X12 outbound transactions generated by DSHS will be available in this folder

'HIPAA Error' – Any inbound file that is not HIPAA compliant or is not recognized by ProviderOne will be moved to this folder

Folder structure will appear as:

2.3.3 File Naming Convention

The HIPAA Subsystem Package is responsible for assisting ProviderOne activities related to Electronic Transfer and processing of Health Care and Health Encounter Data, with a few exceptions or limitations.

HIPAA files are named:

For Inbound transactions:

HIPAA.<TPId>.<datetimestamp>.<originalfilename>.<dat>

Example of file name: HIPAA.101721500.122620072100_P_1.dat

- <TPId> is the Trading Partner Id
- <datetimestamp> is the Date timestamp
- <originalfilename> is the original file name which is submitted by the trading partner.

2.4 Transaction Standards

2.4.1 General Information

HIPAA standards are specified in the Implementation Guide for each mandated transaction and modified by authorized Addenda. Currently, the 837 transaction has one Addendum. This Addendum has been adopted as final and is incorporated into DSHS requirements.

An overview of requirements specific to the transaction can be found in the 837 Implementation Guide. Implementation Guides contain information related to:

- Format and content of interchanges and functional groups
- Format and content of the header, detailer and trailer segments specific to the transaction
- Code sets and values authorized for use in the transaction
- Allowed exceptions to specific transaction requirements

Transmission sizes are limited based on two factors:

- Number of Segments/Records allowed by DSHS
- DSHS file size limitations

DSHS limits the size of the transaction (ST-SE envelope) to a maximum of 5,000 CLM segments.

DSHS limits a file size to 50 MB while uploading HIPAA files through the ProviderOne web portal and 100 MB through FTP.

2.4.2 Data Format

Delimiters

The ProviderOne will use the following delimiters on outbound transactions:

- Data element separator - Asterisk (*)
- Sub-element Separator - colon (:)
- Segment Terminator - Tilde (~)

Dates

The following rules apply to any dates in the 837 transaction:

- For the 837 Professional and Dental all dates will be formatted according to Year 2000 compliance, CCYYMMDD, except for the ISA09 element where the date format is YYMMDD.
- For the 837 Institutional all dates will be formatted according to Year 2000 compliance, CCYYMMDD, except for the ISA09 element where

the date format is YYMMDD and the Admission Date/Hour where the date format is CCYYMMDDHHMM.

- The only value acceptable for "CC" (century) is 20. The exception to this rule is for any of the Date of Birth values.
- Time is in military time format, 1 to 24 to indicate hours and 00 to 59 to indicate minutes and/or seconds. ISA10 and GS05 elements are formatted HHMM (ie 2115 defines the time of 9:15 p.m.). BGN04 element is HHMMSS (ie 211515 defines the time of 9:15:15 p.m.).
- No spaces or character delimiters should be used in presenting dates or times.
- Dates that are logically invalid (e.g. 20071301) are rejected.

Field Length

HIPAA regulations specify field lengths for all of the data elements of the 837 Healthcare Claim transaction. For some of these data elements, ProviderOne processes fewer characters than the maximum allowed. The Transaction Specifications in section 3 display the ProviderOne field lengths.

Phone Numbers

Phone numbers are presented as contiguous number strings, without dashes or parenthesis markers. For example, the phone number (800) 555-1212 should be presented as 8005551212. Area codes should always be included.

2.4.3 Data Interchange Conventions

When accepting 837 Healthcare Claim transactions from trading partners, DSHS follows standards developed by the Accredited Standards Committee (ASC) of the American National Standards Institute (ANSI). These standards involve Interchange (ISA/IEA) and Functional Group (GS/GE) Segments or "outer envelopes". All 837 Transactions should follow the HIPAA guideline. Please refer to the 837 Implementation Guide for ISA/IEA envelop, GS/GE functional group and ST/SE transaction specifications. Specific information on how individual data elements are populated by DSHS on ISA/IEA and GS/GE envelopes are shown in the table beginning later in this section.

The ISA/IEA Interchange Envelope, unlike most ASC X12 data structures has fixed field length. The entire data length of the data element should be considered and padded with spaces if the data element length is less than the field length.

Example of ISA with the entire data length with padded spaces:

ISA*00* *00* *ZZ*123456789 *ZZ*77045
*040303*1300*U*00401*000001001*1*T*:~

DSHS accepts 837 transaction files with single ISA/IEA and GS/GE envelopes. 837 transactions (with their limit of 5,000 CLM segments within an ST/SE envelope), can have multiple ST/SE envelopes within the same GS/GE envelope.

2.4.4 Acknowledgement Procedures

Once the file is submitted by the trading partner and is successfully received by the ProviderOne system, a response in the form of TA1 and 997 acknowledgement transactions will be placed in appropriate folder (on the FTP server) of the trading partner. The ProviderOne system generates positive TA1 and positive 997 acknowledgement, if the submitted HIPAA file meets HIPAA standards related to syntax and data integrity. For files, which do not meet the HIPAA standards a negative TA1 and/or negative 997 are generated and sent to the trading partner.

2.4.5 Rejected Transmissions and Transactions

837 Healthcare Claims will be rejected if the file does not meet HIPAA standards for syntax, data integrity and structure (Strategic National Implementation Process (SNIP) type 1 and 2). Additionally, the transactions will be validated against DSHS defined custom rules (SNIP type 7) as specified in the Transaction Specification section. Non-compliance of the custom rules will result in rejection of the transaction.
